who died intestate without known heirs, their property escheating to the Town as provided by law. The law further provides that during the period of seventeen years an heir can appear and file a claim for the estate, and if said claim is established, the Town will be accountable to the claimant for the avails of the estate after deducting reasonable charges for the care thereof. If the claim is not made within the time mentioned, it is barred.

This money has been deposited with the Proctor Trust Company, and the income can be used only for school purposes.

\$50.00 was turned over to the Town from the Estate of Thomas Smith, the income of which is to be used for the care of his grave in the Riverside Cemetery. This money was also deposited in the Proctor Trust Company.

The car of chloride, bought this year is nearly all on hand, and should supply our needs for the coming season.

The iron bridge, crossing the Rutland Railroad, south of the railroad station, and the iron bridge at the double road were painted this season, and extensive repairs were made on the floor and roof of Gorham Bridge.

A number of our village streets have never been legally laid out, and the surveys and plans necessary for doing this were made during the summer.

The Town has carried a temporary loan from the Proctor Trust Company of \$8,000 since 1922. We would recommend that the Town pay at least \$2,000 on this loan each year.

D. W. McGARRY

which cannot be used for any but highway purposes and this cannot be classed as assets in reduction of debt.

The net liabilities of the Town for the year ending January 31, 1925, were \$6,956.27, showing therefore the slight increase of \$197.55 in liabilities, January 31, 1926. The permanent highway fund, however, has been increased by one thousand dollars during the current year.

Amount to be provided by town tax, we estimate as follows:

For payment on temporary loan	\$2,000 00

## REPORT OF HEALTH OFFICER

---

Our community has been unusually free from the more serious communicable diseases during the period covered by this report.

There has been an extensive epidemic of German measles and a moderate one of chicken pox. Both of these diseases, however, are the mildest of those reportable.

There have been reported three cases of scarlet fever, one of diphtheria, two of erysipelas, two of mumps, sixty-eight of chicken pox, and one hundred forty-three cases of German measles.

One hundred thirteen dwellings have been placarded. Of these only four were placed under full quarantine.

The usual periodic examination of the drinking water has been made, and once during the summer a sample of water from the upper reservoir was sent to the State Laboratory for analysis. The report on this sample, as well as those on the regular water supply was good.

THOMAS H. HACK, M. D.

February 15, 1926.
